EDUCATION

University of Central Florida – Orlando, FL **Expected May 2028**

Bachelor of Science in Computer Science

Coursework: Database Systems, Data Structures II, Software Development (Project Manager)

EXPERIENCE

H.U.G. | **AI Software Engineering Intern** *September 2026 - Present*

- Maintain and improve the H.U.G. Reading Program website using Angular, Node.js, PostgreSQL, and the Avochato API, supporting **800+ students** and **700+ volunteers** nationwide.
- Collaborate with leadership to evaluate and test AI models, including OpenAI GPT and Google Gemini, for potential integration into educational tools that enhance student learning experiences.

USAA | **Software Engineering Intern** *May 2026 - August 2026*

- Developed a React/Node.js analytics platform to attribute Snowflake compute costs at the table level and visualize historical spend across **100+ tables**, giving the Bank Data team visibility into costs.
- Implemented a query optimizer that analyzed **10+ Snowflake operator metrics**, identified execution bottlenecks, generated optimized SQL, and benchmarked performance on the same warehouse.
- Integrated a NumPy regression model to forecast costs and exposed **3 capabilities.** Cost analysis, forecasting, and query optimization through an **MCP server** for AI assisted workflows.

BNY | **Software Engineering Intern** *June 2025 - August 2025*

- Developed an Angular + Spring Boot library to replace the existing BNY Global Trading Management System, by **moving 90% of validations to the client-side** to reduce backend processing.
- Engineered a MongoDB backed file ingestion for CSV, Excel, and TXT files with AG Grid transformations and cell-level validation, **reducing submission errors by 40%**.
- Integrated internal **AI agents** to detect and resolve validation errors automatically, targeting a **60% reduction in manual correction time**.

LEADERSHIP & AFFILIATIONS

SHPE | **Computer Science Director** | UCF GitHub *January 2025 - Present*

- Developed and deployed the SHPE UCF Discord Bot using Node.js and Discord.js, enabling **200+ members** to track attendance, earn points, view leaderboards, and access upcoming events.
- Created an automated event management system using Supabase, implementing unique attendance codes, corporate event tracking, event creation, member management and more.
- Deployed and maintained the bot on a DigitalOcean Linux server using PM2 for continuous operation, while managing the SHPE UCF website and leading technical workshops for members.

PROJECT

Docali Training iOS App | App Store *July 2026 - September 2026*

- Developed and published a React Native (Expo) fitness app featuring customizable workout plans, recovery tracking, workout streaks, and weekly challenges, achieving **10.3K + App Store impressions** and **100+ downloads**.
- Created interactive fitness tools, automated rest timers, multi user workout tracking, counters, and guided calisthenics tutorials, improving workout organization and accessibility for athletes of all levels.

TECHNICAL SKILLS & ORGANIZATIONS & CERTIFICATIONS

Programming Languages: Python, Java, C, C++, JavaScript, TypeScript, SQL, Dart, Swift, PHP

Libraries/Frameworks: React, Angular, Springboot, Next.js, Flutter, Tailwind, React Native

Other Tools: Node.js, AWS, Google Cloud, Firebase, Postgres, MongoDB, Snowflake, Apache, MySQL

Organizations: Codepath, ColorStack, SHPE, KnightHacks, Hack@UCF
